

PILKINGTON

New Pilkington **Optifloat™** Opal

Introducing Pilkington **Optifloat™** Opal. The new translucent glass that's easier to handle.

Whilst they can look stunning and create a beautiful effect, many of the semi-opaque glasses on the market have proved difficult to stock, handle and process – until now.

Pilkington **Optifloat™** Opal offers all the diffused natural light of a translucent glass, but with none of the drawbacks. An acid-etched product suitable for internal or external use, it creates an attractive finish for windows, partition walls, glass doors, furniture, shelving, wall cladding and many more applications.

But the real beauty is that it can be stored and processed in the same way as standard float glass, is readily available from stock in a range of sizes and thicknesses and can be easily toughened, laminated or screen-printed – making Pilkington **Optifloat™** Opal the ideal choice.

Features:

- acid etched glass
- high light transmittance
- diffuses light to give a uniform natural look
- 'velvet smooth' and durable surface
- can be used internally and externally
- etched surface is anti-reflective

Benefits:

For consumers:

- high perceived value in any application
- creates excellent privacy whilst allowing light in
- weather-resistant

For processors:

- available from stock
- can be stored and processed as ordinary float glass
- easily toughened, laminated and screen-printed
- available in 4, 6, 8 and 10mm thicknesses
- stock size 3210 x 2250mm (other sizes available on request)
- Typical light transmittance of 87% (4mm)

Applications:

- Windows
- Partition walls
- Glass doors
- Glass furniture
- Doors
- Shelves and cabinets
- Display cases
- Working surfaces
- Wall cladding
- Balustrades
