MARCH (Moscow Architectural School), Moscow

Modern, light transparent room design

Approx. 300 m² Pilkington **Profilit** K25 Micro and K25 Micro Opal

In October 2012, Moscow Architectural School – MARCH' in Moscow was inaugurated.

MARCH works in close partnership with the British Higher School of Art and Design (Moscow) and London Metropolitan University (UK). MARCH forms part of a consortium of independent schools along with the British Higher School of Art and Design, Moscow Film School and School of Computer Graphics 'Scream School' that provides highly qualified education in a creative sphere. With the new developed model of architectural education in Russia experts shall be trained on the highest international standards.

Architects: Nikitia Tokarev, Maria Saxon, Arseniy Leonovich

The rooms were designed with Pilkington **Profilit™**. Thus the jointly used entrance area, the Café and the lounge were designed in a modern, transparent and flexible way. In addition, the Pilkington **Profilit™** partitions beside the design aspect also deliver natural daylight what provides a creative ambience flooded with light.

New building Eberspächer Plant 2020, Wilsdruff (D)

The „UFO“

Approx. 5000 m²

Pilkington **Profilit™** K25/60/7 Clear

Pilkington **Profilit™** K25/60/7 Clear Plus 1.7

Pilkington **Profilit™** K25/60/7 Clear Amethyst

Pilkington **Profilit™** K25/60/7 Slim Line

Pilkington **Profilit™** K25/60/7 Slim Line Amethyst

Facade glazing as a warm facade, in some areas with TIM (translucent insulation material)

Installer: Rieser Glasbau GmbH & Co. Montage KG, Nördlingen
Architect: DIA 179 German Industry Architecture GmbH, Berlin

The "UFO" called building resembles a rim of a car wheel and encloses an area of 25,000 square metres for production and logistics. With Pilkington **Profilit™** the straight ones as well as the round glazing areas could be optimally designed to bring a maximum of natural daylight into the building. Pilkington **Profilit™** Clear was installed in the production areas, in the area of the offices Pilkington **Profilit™** with translucent insulation material was installed for better heat insulation and solar control.
