

## Pilkington Texture Glass

Pilkington Texture Glass comprises a range of textured styles and visual effects, providing opportunities for modern design or the faithful re-creation of decor from a by-gone era. It is suitable for windows and interiors.

### Description

Pilkington Texture Glass is manufactured by passing a continuous molten glass ribbon between two rollers, one of which has a pattern that creates a permanent impression.

Pilkington Texture Glass has all the attributes of glass – durability, ease of cleaning and resistance to scratching and marking. It is stocked by most distributors and is a low-cost decorative option.

### Privacy with Translucency

Privacy is an important design consideration. Pilkington Texture Glass is appropriate for areas requiring obscuration and privacy and for areas where privacy from overlooking is required, without sacrificing any natural light. Pilkington Texture Glass provides degrees of privacy through light diffusion and obscuration.

For privacy, pure style or to allow more light into internal rooms, decorative glass gives you a whole range of attractive options. In fact, Pilkington offers more than 20 different patterns from classic to modern to choose from.

The advantages of Pilkington decorative glass are easy to see; it allows maximum light while maintaining privacy or obscuring unattractive views, and also forms an attractive decorative feature itself.

### Features and Benefits
